SUMMARY

Computer Science student at Meadow Institute of Technology (expected graduation May 2027) with practical experience in frontend development using React and TypeScript.

SKILLS

React, TypeScript, JavaScript, HTML, CSS, Git, Vitest.

PROJECTS

Campus Room Booker (January 2026 – April 2026): Built room-availability and booking-form screens using React and TypeScript. Integrated frontend with existing REST endpoints and implemented client-side form validation, loading indicators, and error handling for unsuccessful API responses.

Enhanced booking form accessibility by adding visible keyboard focus states, associated input labels, and accessible error text; manually verified keyboard flow. Authored 18 Vitest unit tests for validation and error states. Utilized Git branches and pull requests for collaborative development.

COURSEWORK

Completed introductory cloud foundations course (June 2026) covering cloud vocabulary, shared responsibility, and service categories.
