SUMMARY

Computer Science student at Meadow Institute of Technology (expected graduation May 2027) with experience in frontend development, Git workflows, and testing.

EDUCATION

B.Tech in Computer Science, Meadow Institute of Technology, August 2023 to May 2027 (expected graduation).

SKILLS

Proficient in React, TypeScript, JavaScript, HTML, CSS, Git, and Vitest.

PROJECTS

Campus Room Booker (January 2026 – April 2026): Developed frontend screens for room availability and booking forms using React and TypeScript. Implemented client-side form validation, loading indicators, and inline error messages. Connected interfaces to REST endpoints and authored 18 Vitest unit tests for validation and error states.

Campus Room Booker: Improved accessibility by adding visible keyboard focus states, associated input labels, and accessible error text. Utilized Git branches and pull requests for collaborative development.

COURSEWORK

Completed introductory cloud foundations course (June 2026) covering cloud vocabulary, shared responsibility, and basic service categories.
