EDUCATION

B.Tech in Computer Science, Meadow Institute of Technology, August 2023 to May 2027 (expected graduation).

SKILLS

React, TypeScript, JavaScript, HTML, CSS, Git, Vitest.

PROJECTS

Campus Room Booker (January 2026 to April 2026): Built room-availability and booking-form screens using React and TypeScript.

Implemented client-side form validation, loading indicators, and inline error messages; connected screens to existing REST endpoints for listing rooms and creating booking requests.

Handled unsuccessful API responses in the interface and authored 18 Vitest unit tests for booking form validation and error states.

Added visible keyboard focus states, associated input labels, and accessible inline error text to the booking form; manually checked keyboard flow.

Used Git branches and pull requests to submit changes within a three-person project group.

COURSEWORK

Completed an introductory cloud foundations course (Meadow Learning Club) in June 2026.
